

GMI SPECIALTY VINYL AND DRAWING PAPER

GMI DP6000 Drawing Paper 60lb.

This is a unique high quality, coated stock that provides a much improved image when drawing with felt or standard pens. The ink stays on the surface and is not absorbed rapidly, diffusing the image edge. A few minutes drying time should be allowed after applying the ink. Because of the high density of this paper, pouncing holes are much more uniform and provide improved durability on pin registration.

GMI STATIC CLING HS-800 SERIES

Specially formulated films with no adhesive coating so the applied surface is left residue free when removed. The graphic image can then be saved for re-use. The face film is composed of 7.5 mil flexible vinyl with a 2 year interior of window glass durability. Both sides cling securely to glass and other surfaces creating excellent water/humidity resistance and dimensional stability. Available in clear and white colors.
