
SCREEN PRINTING CHEMICALS

Degreaser 260

A multi-purpose, concentrated citrus product that does the job of 3 products! This non-abrasive, water-based formula degreases new and used mesh and removes unwanted residue. As a nonflammable ink degrader, it emulsifies inks for easy water removal before reclaiming. It is a safe, non-caustic screen dehaizer that will not deteriorate the mesh and will not burn skin or clothing. Freeze/thaw stable.

**Per Gallon: \$27.08
Five Gallon: \$119.00**

Reclaimer 660

A high-quality, ready-to-use stencil remover that quickly breaks down our indirect reflex films and capillary films. For safe handling, it requires no mixing, and our unique packaging offers easy-to-use, labeled sprayers in combination with the 5-gallon refilling station. Reclaimer 660 is non-corrosive and safe for shipping. Freeze/thaw stable.

Per Gallon: \$24.50

SCREEN PRINTING CHEMICALS

Photo Emulsion Blue DZ 307

- Excellent leveling for low Rz values
- Reduces negative effects caused from poorly cleaned screens
- High stencil buildup with fewer coats
- Non-sagging viscosity on low mesh counts
- Easy development
- Excellent resolution
- Excellent mesh bridging
- Balanced color for easy inspection and easy on press registration
- CL version is colorless for especially easy on press registration
- High durability for long print runs
- High flexibility to handle low mesh tensions and high squeegee pressures
- Easy reclaim without staining
- Extended unexposed screen life

Per Gallon: \$48.90

Dual Cure Photo Emulsion Blue DC 521

Universal, blue dual cure photo emulsion intended for most textile and graphic shops who need a versatile, inexpensive stencil. Its high 37% solids, low viscosity and excellent leveling allows for fast coating without pinholes. DC 521 copies with incredible detail and speed. A low cost, high performer.

Per Gallon: \$52.40

SCREEN PRINTING CHEMICALS

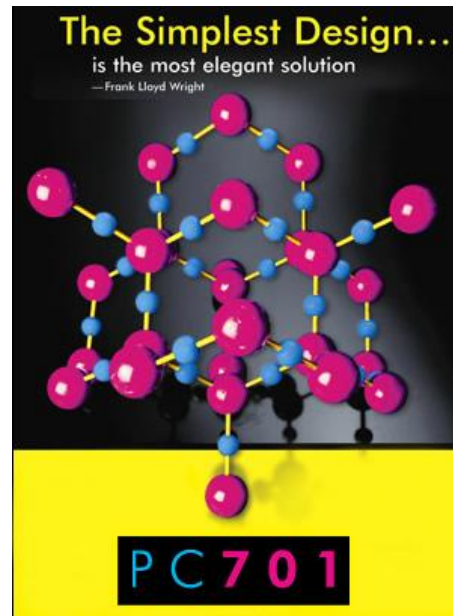

Dual Cure Photo Emulsion Red DC 565

Premium, universal, red dual cure photo emulsion intended for all extreme textile and graphic printing applications. With medium viscosity and an extremely high 46% solids, DC 565 yields high stencil buildup with low Rz. It offers superior resolution, wide exposure latitude and outstanding performance.

Per Gallon: \$59.93

PC 701 Emulsion

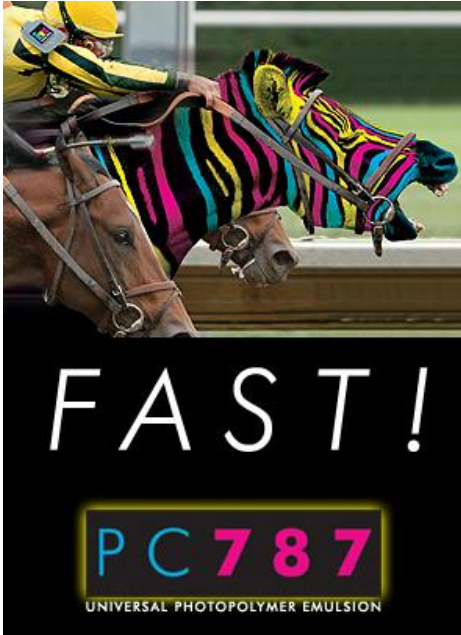

Possibly the fastest exposing one-part available, PC 701 also has the highest known solids content of any emulsion! Testing has shown PC 701 to expose more than 3 times faster than other SBQ emulsions. With extremely high 52% solids, this SBQ emulsion allows you to use minimal coatings and create high-density stencils of 400+ microns, replacing more expensive capillary films. It offers textile printers excellent resistance to plastisol ink, easy reclaimability and an extended shelf life.

Per Gallon: \$76.48

SCREEN PRINTING CHEMICALS

PC 787 Dual Cure Emulsion

Reformulated, PC 787 Universal Photopolymer Emulsion is a new advanced product featuring fast exposure times and extreme durability. Additionally, PC 787 offers superior resolution and mesh bridging, easy reclaim without staining, and extended shelf life.

APPLICATIONS:

- Textile inks — plastisol inks
- Graphic inks — conventional and 100% UV-curable inks
- Adhesives — solvent based and 100% UV-curable

Per Gallon: \$79.80

Blockout Red 421

An inexpensive, water-based solution used as a plastisol, UV and solvent-based ink barrier. This bright red blockout and touchup liquid has just the right viscosity to spread easily over every mesh count. Solvent-enhanced agents greatly reduce dry times, yet the formula is nonflammable. Blockout 421 is water-soluble; therefore, it is not intended for use with water-based inks.

APPLICATIONS:

- Barrier against all plastisol, UV and solvent-based inks
- Blemish touchups
- Low and high mesh counts

Per Gallon: \$26.50

SCREEN PRINTING CHEMICALS

Chromo/Haze™ Haze Remover

Fast and effective for removing stubborn ghosts from screens without the strong odor found in many haze removers. Engineered for stability, Chromo/Haze™ allows its use with all films and emulsions.

PERFORMANCE PROPERTIES:

- Virtually no odor
- Uniform consistency
- No chunks
- Works fast
- Extremely effective

10 lb. Pail Price: \$55.50

Platinum Mist 200 Spray Adhesive (Aerosol)

A general purpose spray adhesive with VOC compliance for screen printers. Platinum Mist 200 is extremely effective as a "flash" adhesive. The product is ideal for screen printing applications where a strong bond, offering multiple fabric pulls is necessary.

PERFORMANCE PROPERTIES:

- Fast Tack
- Quick Adhesion
- Repositionable
- Non-staining
- Non-ozone depleting
- High Temp, great for flash cure

**2 Cans Price: \$5.75
Case Price: \$49.00**

SCREEN PRINTING CHEMICALS

Screen Pro Screen Opener

A general purpose, industrial strength aerosol screen opener that acts instantly to open up dried up ink areas and prevent screen clogging.

PERFORMANCE PROPERTIES:

- Instant Action
- Low Odor
- Opens Clogs Immediately
- Leaves No Film
- For Use With Screen Inks

Can Price: \$4.95
Case Price: \$ 34.95

Hot Stuff Aerosol Adhesive by ANC

Designed for the textile screen printer who is using flash curing technique on the ink, ANC Hot Stuff Heat Activated Aerosol Adhesive represents the latest in state-of-the-art adhesives offered to screen printers. This clear mist type spray is suited for the rapid heat cycles encountered in the flash cure process.

PERFORMANCE PROPERTIES:

- Non-staining and Non-Wrinkling
- Does Not Contain Chlorinated Solvents
- High Tack, Lasting Pallet or Platen Adhesive
- Firmly Secures Textiles and Fabrics for Flash Cure

Can Price: \$4.95
Case Price: \$ 39.95

"Green" Screen Printing Chemicals
Biodegradable, Non-caustic, Non-toxic!

Strip-e-Doo

Franmar Strip-e-doo is fast acting, thick and stays in place as it breaks down the toughest of emulsions. Reclaiming screens has never been any easier!

Strip-e-doo Emulsion Remover	Size	Price
	Gallon	\$28.95
	5 Gallon	\$136.95

d-Grease Degreasing Agent

Franmar's d-Grease is made from distilled corn oil that is perfect for removing left over solvents from your screens. It rinses clean with hot or cold water, and you will not need to stop production since you can immediately re-tape.

d-Grease Degreasing Agent	Gallon Price
	\$16.95

d-Haze Ink Haze Remover

Franmar's d-Grease will not only remove any ghost image traces, but it will do it without causing your nose and eyes to burn or be irritated. Some customers have used this product with screens that are over 10 years old with great effectiveness!

d-Haze Ink Haze Remover	Gallon Price
	\$47.95

Bean-e-doo Textile Ink Cleaner

Bean-e-doo has all the cleaning power but it is 100% biodegradable and non-toxic. It washes off with water, won't harm your skin, has no strong noxious odors and can be disposed of safely. What more can you ask in a screen saver!

Bean-e-doo Textile Ink Cleaner	Price
	\$28.95

NEW "Green" Screen Printing Chemicals
Biodegradable, Non-caustic, Non-toxic!

Wash Away Non-Textile Ink Cleaner

Wash Away Non-Textile Ink Cleaner screens almost every ink a screen printer might use with the exception of Plastisols, which are still best cleaned with Bean-e-doo. Order Wash Away to make your ink removal both clean and simple!

New <i>Green</i> Product	Size	Price
Wash Away Non-Textile Ink Cleaner	Gallon	\$39.00
	5 Gallon	\$169.00

Franmar's Biggy Scrub Pad and Biggy Reusable Handle

Franmar's **Biggy Scrub Pads** come in gentle white or in super tough red or blue varieties. They clean thoroughly without damaging emulsions or absorbing solvents! The **Biggy Reusable Handle** makes clean-up a breeze!

New Product	Price
Biggy Scrub Pad	\$1.25
Biggy Reusable Handle	\$1.50

Will Not Damage Your Emulsion or Absorbing Solvent!
