

## HEAT TRANSFER VINYL

### Easy Weed Transfer Material

**Easy Weed** is a polyurethane, ready-to-cut material designed for custom garment decoration. Easy Weed is in a league of its own because of its pressure sensitive carrier. This feature allows you to weed small letters and fine designs easily. Much thinner than other film materials, Easy Weed offers excellent durability, even after repeated washings. It's great for player names and numbers or adding personalization to corporate wear. Because of its thinness, it's extremely easy to cut, weed, and heat apply and is perfect for single color or multi-layered applications. This is a **HOT PEEL** product.]

### Compatible Fabrics

- **100% Polyester**
- **100% Cotton**
- **All Poly/Cotton Blend**

Size	Styles	Price
15 in x 10 yd	Colors/Neons	\$79.95/\$89.95

## HEAT TRANSFER VINYL

### 20 x 18 Teflon Sheets

**Siser Teflon Sheets** are high quality protective Teflon sheets which are manufactured to the highest standards to conform to the latest industry requirements. The reusable sheets prevent fabric scorching in heat transfer applications.

#### Suggested Uses

A single sheet of Teflon is used to place on top of your transfer and garment and is sized to completely cover everything on your lower platen. An upper Teflon sheet is one of those things that is better to have and not need it, than it is to need it and not have it.

First, the sheet keeps any possible dyes from colored garments and residue from your transfers from getting on the upper heater block. A heater block can be wiped off, but it is much easier and simpler to wipe off the Teflon sheet. Second, some transfer times and temperatures are very close to the scorch point of fabrics. A Teflon cover sheet helps to prevent possible scorching.
